

ANNUAL REPORT | 2022

OUR VISION

The Kensington Conservancy will work to inspire all members of the St. Joseph Channel community to embrace positive conservation values that will promote the protection and preservation of natural ecosystems for all generations.

OUR MISSION

The mission of The Kensington Conservancy is the establishment, development, maintenance and management of nature reserves and programs in the St. Joseph Channel for the conservation and preservation of the natural ecosystems.

ABOUT US

The Kensington Conservancy is a land trust that works to protect lands and waters by purchasing property, accepting donations of land and through voluntary conservation agreements. These protection methods are all aimed at preserving our precious landscape in perpetuity.

The Kensington Conservancy believes that conservation and preservation can also be achieved through the good stewardship practices of all property owners. We work with local landowners, farmers, governments, schools and other organizations to develop programs that will promote greener and less intensive development, best land and water management practices, invasive species control and low impact recreational activities.

Our membership includes residents of Canada and the United States who represent various interests including permanent and seasonal residents, businesses, government, and the scientific and academic communities. As one of North America's few bi-national land trusts, the Kensington Conservancy is a registered charity in both Canada and the United States. The conservancy received Canadian charitable status in 2006, making 2022 our sixteenth year of operation.

LETTER FROM THE PRESIDENTS

Attention all conservancy friends, members and supporters. We have not forgotten you, or our goals for the environment and our beautiful St. Joseph Channel area. It is indeed amazing to be able to live, work and visit this section of the world teeming with life and promise. The Kensington Conservancy has continued to develop our mission of protecting lands and waterways. To that end, our staff has worked diligently, our board with creativity, and our members with time and talent.

The year 2022 began slowly, many things still crippled by COVID-19, uncertainty, and vague direction. We did not stop working during COVID-19, but were limited in scope, and unable to accomplish many of our goals. Soon, however, things began to loosen and we were able to gain some momentum and direction. The conservancy was able to purchase a boat so we could navigate our waterways and keep track of our properties, and of course, our members. If you notice the TKC Heron floating around, be sure to say “hi” to our staff.

Perhaps the most notable item of early 2022, was the acquisition of a new property named Gravel Point Preserve. This was the culmination of many years of work both on the part of our staff and the benefactors, particularly Betsy and Bill Kingery. The location on St Joseph Island was new too, as we had never acquired property in this area before. Also, thanks to members’ generous donations, a parking area was installed, and now we get many hikers and snowshoers who appreciate a leisurely “walk” in nature. If you haven’t already been there, do go! I will depart here, and let Dick Warren finish this report, as he became TKC’s President in September 2022.

ALICE HILL, PAST PRESIDENT

Hi everyone. Alice finished her term and decided to leave the board in July. We owe a huge THANK YOU! to Alice Hill for her service over the 14+ years she has been on the TKC board. She has taken us through challenging times with her steady, positive, leadership, and dedication to our mission. Among Alice’s many accomplishments, the planning and construction of The Kensington Conservation Centre, and her term as president since 2019, stand out. Alice is still around, now serving as “Past President” in a new role we established in September. She continues to be a wonderful advisor and mentor to the board!

Zoom has made it possible for the TKC board to be much more engaged than previously. We have several committees that are busy working to support our very talented staff. Committees have board members and non-board members who are all volunteers – we are grateful for their service!

Carter, Corinne, Susan Lang and I attended the Canadian Land Trust Summit in Ottawa, where I learned a lot about the provincial and national land trust movement, and Canada’s commitment to preserve a third of its land by 2030. TKC is doing a great job contributing its part to Canada’s global climate initiative!

Thanks to those of you who donated, we had a successful Annual Campaign! The Annual Campaign provides our operating budget for the year, and there are several other worthwhile entities asking for donations to preserve and protect our TKC community. We are very grateful for your loyalty to our mission!

Sadly, we lost David Hofmann and Jason Schnieder this year. Jason was a key supporter, and donated property to the Gravel Point Preserve. You can read about David on page 15 of this report.

We have exciting things happening in 2023, so please contact me or come by The Kensington Conservation Centre any time to hear about them!

DICK WARREN, PRESIDENT OF THE BOARD OF DIRECTORS

A MESSAGE FROM OUR EXECUTIVE DIRECTOR

Almost every day, I see a headline in the news about the biodiversity crisis, a species going extinct, the impacts of climate change, a new invasive species appearing, or critical wildlife habitat being destroyed. Much of this is happening elsewhere, but we certainly are not immune to it here. I continue to be grateful that I get to spend every day working to combat these issues. It's a huge cliché to say that it doesn't feel like work if you love what you do, but it's very true.

The protection of the Gravel Point Preserve in 2022 was very exciting. There is a long list of reasons that this acquisition is special, but for me, I grew up on St. Joseph Island, so it was extra special that I got to help ensure that an additional 278 acres of it will stay as it is in perpetuity. I hope that this is the first of many conservation projects that TKC will undertake on the island.

If you were not already aware, the Government of Canada has set a goal of conserving 30% of Canada's land and water by 2030. The latest data shows that only about 14% of the country has been formally protected so far, so there is still a lot of work to do over the next seven years. Here on a local level, I quickly calculated that only about 1.6% of our St. Joseph Channel focal area has been protected so far. Getting to 30% of the channel area formally protected may be even more ambitious than the federal goal, but we will continue to target the protection of land with high ecological values and with each acre protected, we will get closer.

I continue to be impressed by all of the work that Corinne and Angela have been able to accomplish in the last couple of years. In addition to caring for our existing nature preserves and conservation easements, Corinne has been able to establish three new monitoring programs, develop a very active volunteer program, successfully apply for many grants, oversee our seasonal staff, and much more. Angela's work is more behind the scenes, but is integral to keeping the organization running smoothly. There's not a single problem that she cannot find a solution to.

Thank you to all of you who support our work. Together, we are making a difference for our local land, water, and biodiversity.

CARTER DORSCHT, EXECUTIVE DIRECTOR

TREASURER'S REPORT

2022 was a very active year for the conservancy, with major projects like the Gravel Point Preserve being completed. The conservancy continues to be financially stable with large cash reserves. The attached chart and my comments below highlight the significant changes in our revenue and expenses. Expenses are allocated among the various programs shown on the chart. For more details, please refer to our 2022 financial statements on our website.

In 2021, we received over \$47,000 from the Canada Emergency Wage Subsidy from the Government of Canada for COVID-19. We did not receive any of these wage subsidies in 2022, resulting in higher net wage costs. However, we received numerous other wage grants in both years, which helped offset expenses.

This year's increase in membership revenue was primarily due to a change in how we track memberships during our annual membership drive. Year over year, memberships have increased. Individual memberships are now tracked separately from donations.

The donation revenue increase was largely a result of major fundraising for the purchase of the Gravel Point Preserve and the required stewardship funds. We also received some additional donations to help purchase a boat.

This year's interest reduction was because of a significant loss in US marketable securities.

In 2022, we had grant expenses unrelated to wages. These included equipment costs and other expenses.

Last year could have been better for our investments in the endowment fund. The market downturn hurt our returns since 45% of the endowment fund is in the stock market. We are seeing better returns this year. The investments in the endowment fund are long-term, so some year-to-year fluctuations are expected. We are investing our fixed-income securities at higher returns with rising interest rates.

Because our investments in the stewardship fund are in fixed income, we did not suffer any losses. The increase in the fund was from our returns and the stewardship funds that were added for the Gravel Point Preserve.

While we receive some government funding, we can only operate with the generous support from our members.

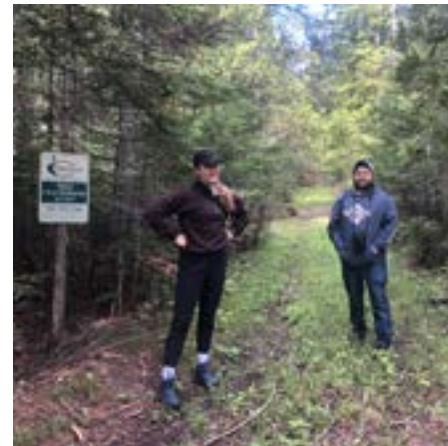

Finally, I would like to thank Angela Charbonneau for all her help during the year. She makes my job easy.

Thank you.

TOM DALTON, TREASURER

A YEAR IN REVIEW 2022

- Launched our Bat Monitoring and Education Program and our Water Quality Monitoring Program
- Awarded the Pam Bent Conservation Award to Chris Lee
- Protected 278 acres on St. Joseph island with the creation of the Gravel Point Preserve
- Co-hosted the Algoma Earth Day BioBlitz
- Hired Roxanne Bergeron and Bella Ross as Assistant Field Technicians
- Hosted the 5th annual Explorer Summer Day Camp with the St. Joseph Island Hunters and Anglers Association
- Recorded almost 250 species of flora and fauna during the Gravel Point Preserve BioBlitz
- Opened a 1.5km loop hiking trail on the Gravel Point Preserve
- Conducted the 7th annual Desbarats Christmas Bird Count
- Recorded over 750 species of flora and fauna on our protected properties throughout the year

“And I dream of the vast deserts, the forests, and all of the wilderness of our continent, wild places that we should protect as a precious heritage for our children and for our children’s children. We must never forget that it is our duty to protect this environment.”

~ NELSON MANDELA

2022 SUMMER STUDENT RECAPS

Monitoring the many beautiful protected properties at TKC was such a privilege. On days out in the field, I would often send a photo to friends or family and say “this is my office today”. I was able to deepen my knowledge of local flora and fauna, gaining a special interest in the bumble bees and mosses of the region. Ripple Rock Preserve and the Hole in the Wall Easement were my favourite properties, the latter of which had an incredible wetland where I’m sure I could have spent a few more hours exploring. I also had the pleasure to meet and speak with many interesting people over the summer with whom I had plenty of meaningful conversations about environmental work and the like. The longer I’m in it, the more it becomes apparent that somehow everyone in the environmental field knows each other, so I’m sure I’ll run into some of you again.

The work that The Kensington Conservancy does is incredibly important and has proven to be very meaningful to a lot of people. I am so glad to have been able to take part in it for a short summer and wish TKC all the best in the future.

~ Roxane Bergeron

In my short time with The Kensington Conservancy, I have been able to explore almost all 13 of our nature preserves/easements and it has been such a great learning experience. Prior to this, whenever I went out on a hike, I was just there for the view at the top and the exercise along the way (and while I will never be at Carter’s level of outdoor explorer, I now appreciate much more a good nature hike and logging my findings into iNaturalist to look back at). I learned all about the different species of ladybugs (there are 900+ worldwide, which blew my mind!). And we did a lot of work in our pollinator garden planting species that will help to attract bees, butterflies, and moths. We also got to spend some good time exploring the newest property on St. Joseph Island, the Gravel Point Preserve, which was cool to be able to see all the different species living and growing there.

Over the summer months we were also able to host and attend lots of community events including guided hikes and paddling events, community parades, and participate in the Sustain Algoma Expo. Being able to get out and explore the Algoma region in different ways and interact with the community has been one of my favourite parts of my time with The Kensington Conservancy.

~ Bella Ross

GRAVEL POINT PRESERVE

In 2022, The Kensington Conservancy was excited to announce the acquisition of a new nature preserve, the Gravel Point Preserve. It is located just south of Hilton Beach along Highway 548 in the Gravel Point area. The preserve consists of four adjacent lots for a total of 278 acres. It features mixed forests and wetlands, which is great habitat for thousands of wildlife and plant species. This is The Kensington Conservancy's first nature preserve on St. Joseph Island and our largest protection project to-date.

Throughout the year, staff and volunteers worked hard to create a baseline inventory of the species of flora and fauna on the preserve. Almost 500 different species have been recorded so far, including many at-risk species, as well as a few that are rare and uncommon for the area.

In October, a 1.5km loop hiking trail opened on the preserve, thanks to the hard work and dedication from our volunteers. The trail takes users through a variety of habitat types, allowing them to see the beauty of the Gravel Point area. Additional trails will continue to be built in the coming years.

The creation of the Gravel Point Preserve was made possible by Betsy and Bill Kingery, who donated one of the lots that makes up the preserve and the funds to purchase the other three. "My grandfather, Nathan Ransohoff, brought his family to Hilton Beach in 1923, and since then at least one Ransohoff has visited the island every year, except perhaps during WW2," stated Betsy. "In 1974, my husband Bill and I honeymooned on St. Joseph Island, and Bill grew to love the island as much as I did. In 2003 we bought property on Gravel Point and built our own cabin for our growing family."

"There is so much that is special about St. Joseph Island: the sound of the water against the rocks, the creaking of the trees, the pine-scented breeze, and the flowers in late spring. So we began to wonder what we could do to give back to a place that has given so much to us over five generations. Five or so years ago we began looking at the interior lots along Highway 548 and Old Orchard Road. The opportunity to protect 278 acres of forest, pond, and stream in perpetuity seemed to be the perfect fit, and having The Kensington Conservancy there to provide guidance, patience and enthusiasm has been key."

We also wish to recognize and thank the late Jason Schneider (who generously donated one-third of the value of his property), Elliot Greenebaum, and Kit and Jill Pappenheimer for being an integral part of this project by selling their properties.

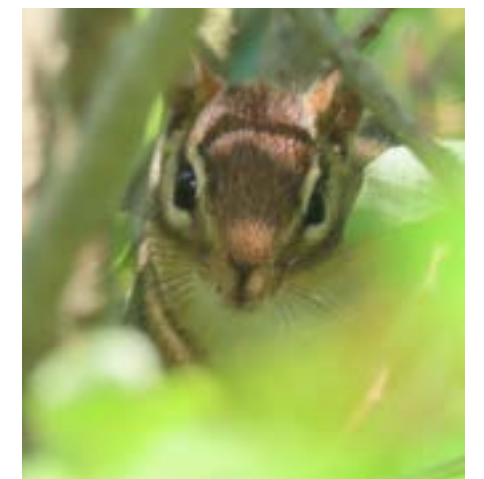

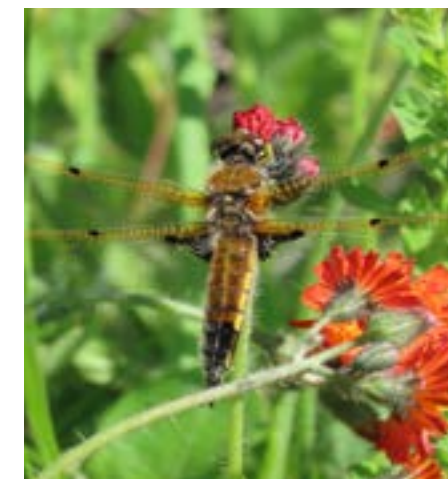

COMMUNITY SCIENCE RECAP

In 2021, we noticed there were no bat observations recorded on any of our protected properties. This was understandable given their nocturnal behaviour and drastic population declines. We were sure they must be living on our nature preserves, so in 2022, we put out ten stationary bat recorders in various locations to find out which species might be present. We were blown away with the number of recordings we collected! We ended up with nearly 60,000 recordings, which is tens of thousands more than we ever expected. A big thank you goes out to Evolugen and TD Friends of the Environment for providing funding for this project. We'd also like to thank the Sault Ste. Marie Ministry of Natural Resources and Forestry office for lending us three additional bat recorders, and to Capstone Infrastructure for donating four bat boxes.

Our location at the heart of the Great Lakes makes us perfectly situated to promote the protection and conservation of the freshwater resources that surround us. In order to know if there are changes to local water quality, we need to have some baseline data to compare it to in the future. In 2022, we recruited volunteers to collect water quality data at various lakes and streams in the area. Our volunteers tested water temperature, pH, chlorine, hardness, alkalinity, conductivity and clarity with easy to use testing kits. In total, 79 water quality observations were collected from 26 different locations. We look forward to expanding this program in 2023 and will be recruiting more volunteers to be a part of it. Thank you to Lake Huron North for funding this program.

The 7th annual 2022 Desbarats Christmas Bird Count took place on December 27, 2022. 24 participants counted 37 species and 2,891 individual birds. Both of these totals are fairly typical when compared to the previous counts. New high counts were set for Sharp-tailed Grouse, Rock Pigeon, Red-bellied Woodpecker, Downy Woodpecker, Pileated Woodpecker, Common Raven, and Blue Jay. This data is made available to scientists and conservationists who study bird populations in North America.

LEGACY CIRCLE

A legacy gift in one's estate will help sustain The Kensington Conservancy and its ability to keep its promise to preserve and protect the land and water of our area in perpetuity.

The Legacy Circle and bequests are important parts of The Kensington Conservancy. Bequests through Legacy Planning provide opportunities for growth and sustainability.

Legacy donors have allowed us to provide an annual conservation award to a Sault College student, pay off the purchase of the Boyer Preserve, build The Kensington Conservation Centre, contribute to our Stewardship and Endowment Funds and purchase the east half of Coatsworth Island. Thank you to the following Legacy Circle members.

Pam Bent
David Hofmann
Erl Lagerholm
The Phelps Family

The following individuals have identified that they've made bequests to The Kensington Conservancy in their Estate Plans:

Mary & Donna Deplonty
Tina & Terry Haight
Virginia Jordan
Connie & Alden Meyer
Libby & Matt O'Connell
Deke & Hope Welles
Peter Welles

Please consider including The Kensington Conservancy in your will and estate planning. Don't hesitate to call or email Carter, our Executive Director. He can help you by providing TKC's tax ID for you to share with your attorney. He will also add your name to the Legacy Circle list after you have notified The Kensington Conservancy of your intentions to leave a bequest.

IN MEMORIAM DAVID HOFMANN

The Kensington Conservancy is deeply saddened by the recent passing of David Hofmann.

David greatly enjoyed spending his summers on Mink Island, where his grandparents established a summer home early in the 20th century. He participated in most of the various activities that occur around the lake, and was particularly fond of boating in the large old wooden inboard boats. David was an avid bird watcher in Desbarats and elsewhere.

David will be remembered for his quiet, gentle demeanor; unless you may have seen him in a performance, or heard him sing a moving song.

David had a strong passion for conservation within the St. Joseph Channel area. He was one of The Kensington Conservancy's founding board members and served on the board until 2019. He was the President of the Board of Directors from 2016 to 2019.

Our condolences go out to all of David's family and friends.

BOARD OF DIRECTORS

The Kensington Conservancy Board of Directors boasts a broad cross section of the local community. It has citizens from Canada and from the United States, permanent and summer residents, those with long family histories and those with new experiences in this vibrant community. Everyone comes to the table with a genuine love of land and water and a wish for future generations to enjoy the same treasures. Listed below are the members of the board of directors.

Executive Committee

- Richard Warren **President**
- John Hollingsworth **1st Vice President**
- Terry Haight **2nd Vice President**
- Nancy Schrank **Secretary**
- Tom Dalton **Treasurer**

Directors

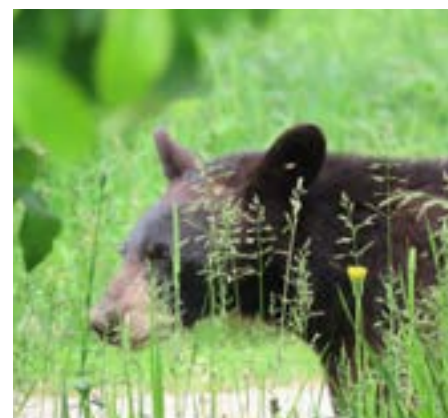

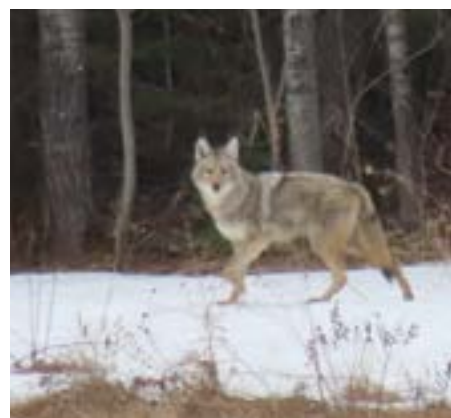

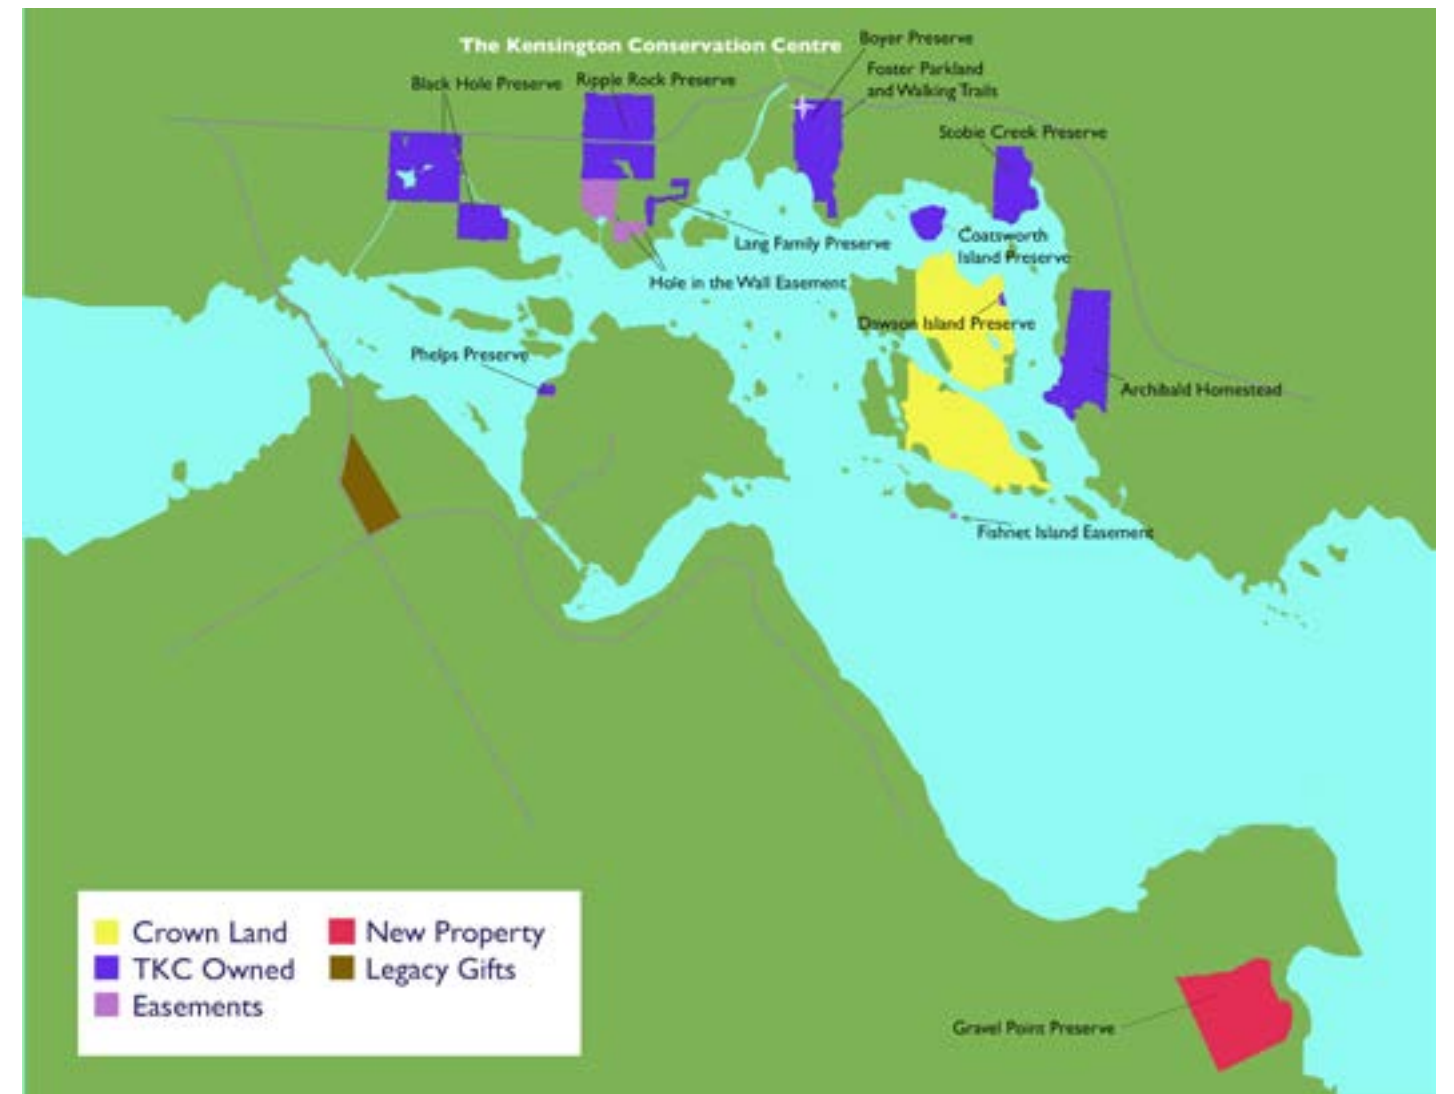

- Bess Celio
- Libby Haight O'Connell
- Susan Lang
- Kathleen McFadden
- Alden Meyer
- Phil Murray
- Sarah Vincenzo
- Hope Welles

Board of Advisors

- Holmes Morrison
- Adele Simmons
- Georgia Welles

Staff

- Carter Dorscht **Executive Director**
- Corinne Wilkerson **Land Stewardship Coordinator**
- Angela Charbonneau **Office Manager**
